

LEGAL MATTERS

Criminal Prosecution OS

Platform Screens, Data Elements, Workflows and Automations Extraction

Based on the Legal Matters Criminal Prosecution OS Blueprint v1.0 | Generated 26 May 2026

Purpose. This document converts the Criminal Prosecution OS blueprint into an implementation-ready screen matrix. Each row identifies a likely platform screen or workspace, the users who need it, the UI elements required, the core data to capture or display, and the workflows or automations that should run behind the screen.

Important product note. This is a product extraction and build-planning document, not legal advice. All criminal-law workflows, court recording rules, witness handling, and AI governance controls must be reviewed by qualified South African criminal-law and data-protection practitioners before production use.

1. Master Platform Screen Matrix

This is the main implementation table. It extracts possible screens and workspaces from the blueprint and turns them into build-ready UI, data and workflow requirements.

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
Global / Access	Login, firm selection and secure session start	All users	Login form; firm selector; MFA placeholder; session warning; role-based redirect; restricted-matter notice.	User identity; firm_id; role; permissions; active session; last login; security flags.	Authenticate user; resolve firm context; load role permissions; log access event; route to role dashboard; block restricted matter access.
Global / Dashboards	Lead Prosecutor Dashboard	Lead prosecutor, attorney	Next court date card; charge readiness score; witness risk cards; missing evidence; defence issue list; live suggestions; priority task lane.	Criminal cases; charges; readiness scores; witnesses; evidence items; court sessions; defence versions; tasks; AI outputs.	Generate daily case-control view; escalate unsupported charge elements; surface high-risk witnesses; create court-day priorities; audit AI recommendations.
Global / Dashboards	Evidence Analyst Dashboard	Evidence analyst	Exhibit index; chain-of-custody gaps; digital hash status; admissibility risk board; linked charge and witness filters.	Evidence_items; evidence_chain_events; digital_evidence_hashes; exhibit_status_history; linked charges; linked witnesses.	Flag missing chain records; prompt hash generation; alert on disputed/excluded evidence; assign evidence remediation tasks.
Global / Dashboards	Witness Coordinator Dashboard	Witness coordinator, paralegal	Witness attendance grid; subpoena/service status; interpreter needs; safety risk badges; preparation status; last-contact view.	Witnesses; witness_statements; witness_risk_assessments; witness_prep_logs; court appearances; safety escalations.	Confirm attendance; remind coordinator of missing subpoenas; escalate unreachable/high-risk witnesses; create transport/interpreter tasks.
Global / Dashboards	Investigator Dashboard / Task Board	Investigator, evidence analyst	Missing evidence tasks; new leads; forensic requests; witness follow-ups; defence rebuttal tasks; due-date Kanban.	Investigator tasks; defence_versions; missing evidence; witness follow-ups; forensic reports; court-date deadlines.	Create investigation tasks from docket AI, live snippets and defence issues; track owner/status; escalate overdue items.
Global / Dashboards	Practice Manager Prosecution Dashboard	Practice manager, partner	Delayed matters; high-risk matters; overdue actions; readiness heatmap; workload; court-date risk; audit exceptions.	Matters; readiness scores; delay_events; tasks; audit logs; workload assignments; risk registers.	Monitor operational bottlenecks; assign owners; create delay analysis; alert on matters below readiness threshold.
Global / Dashboards	External Counsel Brief Portal	External counsel	Selected matter brief; chronology; charge matrix; exhibit pack; witness list; secure notes; expiry banner.	External access window; matter brief; documents shared; exhibits; chronology; counsel tasks; access logs.	Create time-limited access; restrict documents; log views/downloads; revoke access after expiry; export counsel brief.
Global / Search	Matter-Limited Search and Intelligence Search	Authorised legal users	Search bar; filters for witness/evidence/charge/date; source result cards; AI-safe search warnings.	Matter records; documents; transcript segments; snippets; evidence IDs; witness statements; AI outputs.	Run matter-limited retrieval; exclude restricted/sealed documents; show source provenance; log search and source set.
Criminal Matter OS	Criminal Matter List / Prosecution Pipeline	Prosecutor, practice manager	Matter table; status filters; court-date filters; risk colour; prosecution route; readiness score; create matter button.	Matter number; docket/CAS number; court case number; court; accused; complainant; route; status; owner; readiness.	Create matter from intake; assign prosecutor; detect missing docket metadata; route high-risk matters to review.
Criminal Matter OS	New Criminal Matter Intake	Prosecutor, paralegal	Step form for case identity, parties, charges, court, docket metadata, prosecution route, sensitivity, owner.	Matter identity; docket/CAS number; court case number; parties; charge category; status; sensitivity; firm_id; matter_id.	Generate matter number; create accused/complainant records; create initial tasks; log matter creation; apply restricted-matter policy.
Criminal Matter OS	Criminal Matter Overview / Command Centre (/matters/[matterId]/criminal)	Prosecutor, attorney, team	Case summary; case theory; charges; witness risk; evidence readiness; next court date; tasks; AI outputs; audit trail link.	Matter profile; parties; charges; court dates; witnesses; evidence; readiness	Refresh readiness score; create missing-proof tasks; generate daily matter brief;

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
				score; risks; AI summaries; audit events.	surface next actions from all modules.
Criminal Matter OS	Case Theory Workspace	Lead prosecutor, attorney	Theory statement editor; proof themes; weak points; defence assumptions; issues list; version history.	Case theory text; issues; proof themes; linked charges; linked evidence; weak points; defence assumptions; review status.	Version case theory; link theory to charges/evidence; flag unsupported theory components; require human approval for final theory.
Criminal Matter OS	Accused Persons Screen	Prosecutor, paralegal	Accused profile cards; aliases; identifiers; bail status; representation; role allegations; custody status.	Accused_persons; identifiers; aliases; role allegations; bail conditions; defence attorney; representation changes.	Track representation changes; update bail risks; create delay event if representation change impacts readiness.
Criminal Matter OS	Complainant / Victim Profile	Prosecutor, witness coordinator	Complainant details; vulnerability flags; communication preference; safety needs; approved update history.	Complainants; contact preferences; vulnerability; safety status; communication log; document requests; consent/notice status.	Trigger trauma-aware update workflow; restrict sensitive contact notes; escalate intimidation/safety risks.
Criminal Matter OS	Investigating Officer and Case Parties	Prosecutor, investigator	Investigator details; station/unit; task list; evidence requests; follow-up history; party relationship map.	Investigators; party links; requests; due dates; notes; contact details; task status.	Assign evidence follow-ups; send approved investigator requests; track overdue responses; audit instructions.
Criminal Matter OS	Court Dates and Appearance Timeline	Prosecutor, attorney, practice manager	Calendar list; next appearance card; appearance type; outcome history; postponement reasons; tasks.	Court_appearances; court_outcomes; presiding officer; courtroom; next date; appearance type; delay_events.	Generate court-day brief; create reminder tasks; capture outcomes; update delay attribution; refresh readiness for next date.
Charge Readiness	Charges List (/matters/[matterId]/criminal/charges)	Prosecutor, attorney	Charge cards; statutory/common-law basis; particulars; alternative charges; readiness colour; missing elements.	Criminal_charges; charge_elements; particulars; alternative charges; linked evidence and witnesses; readiness score.	Create charge element checklist; calculate charge readiness; alert on unsupported or partially supported elements.
Charge Readiness	Charge Detail Screen	Prosecutor, attorney	Charge particulars editor; legal/proof area fields; linked elements; alternative charges; version log; approval status.	Charge ID; category; particulars; statutory/common-law basis; element mappings; linked witness/evidence; version history.	Version charge changes; require review before ready; create tasks when particulars change and proof mapping needs update.
Charge Readiness	Charge Element Proof Matrix	Prosecutor, evidence analyst	Matrix by charge element; evidence links; witness links; transcript snippets; court admissions; red/amber/green support status.	Charge_elements; charge_element_evidence_links; witness links; evidence items; snippets; admissions; human review status.	Auto-create missing-proof tasks; highlight unsupported elements; update per-charge score; maintain version history of mappings.
Charge Readiness	Charge Readiness Report	Lead prosecutor, practice manager	Per-charge score; missing proof; risk actions; human review status; export button; court-date proximity warnings.	Charge readiness scores; proof matrix; tasks; risks; court dates; AI missing information outputs.	Generate readiness report; block trial-ready status below threshold; assign remediation actions before next court date.
Witness Intelligence	Witness Hub (/matters/[matterId]/criminal/witnesses)	Witness coordinator, prosecutor	Witness table; role; statement status; attendance; interpreter need; safety; contradiction risk; prep status.	Witnesses; witness_statements; attendance data; interpreter needs; risk assessments; prep logs; contradiction flags.	Score witness risk; escalate high-risk witnesses; trigger attendance confirmation; create prep/interpreter/subpoena tasks.
Witness Intelligence	Witness Profile	Prosecutor, coordinator	Profile; contact; language; relationship to parties; vulnerability; safety level; statement list; linked charges and evidence.	Name; role; contact; language; interpreter requirement; relationship; vulnerability; safety risk; linked charges/evidence.	Apply sensitive witness restrictions; update risk score when safety or consistency changes; create follow-up tasks.

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
Witness Intelligence	Witness Statement Management	Prosecutor, paralegal	Statement uploads; signed status; version history; author; linked exhibits; inconsistency notes; correction history.	Statement date; version; signed status; author; linked exhibits; corrections; source references; approval status.	Compare statement versions; flag contradictions; prevent final statement from AI-only generation; log edits and approvals.
Witness Intelligence	Witness Preparation Log	Prosecutor, attorney	Ethical prep record; topics covered; warning acknowledgement; no-coaching notice; prep status; notes.	Prep date; user; process explained; statement reviewed; risks noted; acknowledgements; prep status.	Create ethical prep record; require warnings; notify prosecutor of unprepared key witnesses before court date.
Witness Intelligence	Attendance, Subpoena and Service Control	Witness coordinator	Availability tracker; subpoena status; service proof; transport needs; court-day confirmation; reminders.	Availability; subpoena status; service status; transport needs; confirmation date; court date; contact log.	Auto-remind for unconfirmed witnesses; escalate unreachable status; create transport/interpreter tasks.
Witness Intelligence	Contradiction Radar	Prosecutor, evidence analyst	Contradiction list; source comparison; timeline conflict view; live testimony vs prior statement; review buttons.	Witness statements; docket facts; exhibits; live testimony snippets; transcript timestamps; confidence level.	Run comparison; create potential inconsistency suggestion; cite sources; require review; avoid witness truthfulness claims.
Witness Intelligence	Witness Safety Tracker	Prosecutor, witness coordinator	Threat report form; last contact; safety level; restricted notes; escalation status; protection referral marker.	Witness risk assessment; threat reports; last contact; escalation records; safety level; restricted access flags.	Escalate intimidation risk; mark protection referral; restrict access; notify responsible user; log every safety change.
Evidence and Exhibits	Evidence Ledger (/matters/[matterId]/criminal/evidence)	Evidence analyst, prosecutor	Evidence table; evidence ID; type; source; status; admissibility risk; chain state; linked charges/witnesses; filters.	Evidence_items; evidence type; source; date received; linked charge; linked witness; court status; risk flags.	Generate exhibit IDs; flag missing metadata; link evidence to proof matrix; create admissibility review tasks.
Evidence and Exhibits	Evidence Item Detail	Evidence analyst, prosecutor	Metadata panel; file preview; source; authenticity; linked charges; linked witnesses; court status; risk notes; version history.	Evidence ID; type; source; storage location; hash; admissibility risk; linked witness/charge; court status; versions.	Update evidence status; route disputed/excluded items for review; maintain audit trail for views, downloads and changes.
Evidence and Exhibits	Chain-of-Custody Ledger	Evidence analyst, investigator	Creation/source; collection; storage; handover; court introduction; post-court status timeline.	Evidence_chain_events; who/from/to; date/time; location; method; seal number; condition; supporting document.	Require handover data; flag chain gaps; create authenticity task; preserve tamper-evident audit trail.
Evidence and Exhibits	Digital Evidence Hash and Authenticity Screen	Evidence analyst	Hash display; file metadata; upload history; authenticity status; storage location; download restrictions.	Digital_evidence_hashes; file hash; file version; storage path; uploaded_by; timestamp; authenticity status.	Create hash on upload; detect file version changes; restrict download; alert on missing hash for digital evidence.
Evidence and Exhibits	Exhibit Status History	Prosecutor, evidence analyst	Court status timeline; marked/admitted/disputed/excluded; objections; ruling notes; witness who introduced exhibit.	Exhibit_status_history; court session; ruling; objections; witness; exhibit number; post-court status.	Update status from court session; reflect exhibit status in readiness score; generate court pack index.
Evidence and Exhibits	Bundle / Court Pack Index Builder	Prosecutor, evidence analyst	Selectable exhibits; bundle index; linked witnesses; linked charges; missing items; export button.	Evidence items; exhibit status; document metadata; charge links; witness links; court-date requirements.	Generate bundle index; detect missing exhibit documents; create court logistics and document-copy tasks.
Docket Intelligence AI	Docket Upload and Review Workspace	Prosecutor, paralegal	Upload area; document type classification; processing status; source lock; AI processing policy; review queue.	Uploaded statements; reports; exhibits; court notes; evidence lists; metadata; AI processing flag; source set.	Classify documents; extract fields; log provenance; apply AI exclusion rules; queue review tasks.

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
Docket Intelligence AI	Docket Summary Screen	Prosecutor, attorney	Facts; parties; charges; evidence; witnesses; gaps; risks; next actions; source citations; confidence.	Docket AI output; source documents; extracted parties; charges; evidence map; risks; missing information.	Generate source-cited summary; require human review; create suggested tasks; log model/source set.
Docket Intelligence AI	Incident Chronology Builder	Prosecutor, investigator	Timeline cards; source references; date confidence; event type filters; conflicts; export memo.	Statements; reports; court events; evidence dates; transcript snippets; chronology events; confidence levels.	Extract timeline events; flag date/time conflicts; update case theory and defence tracker with new facts.
Docket Intelligence AI	Evidence Map Generator	Prosecutor, evidence analyst	Evidence-to-charge and evidence-to-witness map; proof area labels; risk badges; missing corroboration.	Evidence item; source; linked witness; linked charge; proof area; admissibility risk; missing links.	Suggest proof links; create missing-proof tasks; require reviewer approval before marking support as ready.
Docket Intelligence AI	Missing Evidence Command Centre	Prosecutor, investigator	Missing reports; affidavits; videos; metadata; bank/medical records; chain gaps; owners; due dates.	Missing evidence items; owner; status; source reason; linked charge element; due date; court-date impact.	Auto-create missing-evidence tasks; escalate near court date; update readiness score; notify investigator/practice manager.
Docket Intelligence AI	Prosecutor Memo Generator	Lead prosecutor	Case theory; key evidence; chronology; risks; missing items; suggested strategy; approval controls.	Docket summary; evidence map; witness risks; charge matrix; defence issues; AI output record.	Draft source-linked memo; mark as draft; require prosecutor review; export only after approval.
Court Preparation	Court Preparation Workspace	Prosecutor, attorney	Appearance brief; witness list; exhibit list; proof focus; defence issues; bail/safety; logistics; post-court actions.	Court date; appearance type; required witnesses; exhibit list; charge proof focus; defence issues; risks; logistics.	Generate court-day brief; build checklist; assign outstanding tasks; send approved internal reminders.
Court Preparation	Court-Day Brief Screen	Prosecutor, external counsel	Printable/exportable brief; objectives; witness/exhibit plan; risks; actions; source links.	Appearance brief; court details; proof focus; witness attendance; exhibit status; readiness score.	Auto-generate from matter data; update when court date changes; export counsel pack; log export.
Court Preparation	Court Logistics Checklist	Paralegal, prosecutor	Interpreter; equipment; video playback; remote witness; document copies; courtroom details; readiness flags.	Interpreter requirements; equipment needs; remote witness info; document copy status; court room; technology needs.	Create logistics tasks; alert on missing interpreter/equipment; preserve offline-notes option for technology failure.
Court Preparation	Bail Risk Workspace	Prosecutor, attorney	Custody status; bail hearing dates; bail conditions; breaches; intimidation risk; public safety concerns; next review.	Bail status; conditions; application dates; breach reports; risk notes; safety alerts; next bail review.	Flag breach/intimidation risk; create next bail review task; update court-day brief and victim/witness safety screens.
Court Sessions	Court Sessions List (/matters/[matterId]/court-sessions)	Prosecutor, attorney	Session table; type; date; permission status; AI processing; sensitivity; live/review actions; status.	Court_sessions; session type; date; presiding officer; permission status; sensitivity; AI allowed; status.	Create sessions from court dates; block live capture until gate complete; log session status changes.
Court Sessions	New Court Session (/court-sessions/new)	Prosecutor, attorney	Session creation form; court details; session type; prosecutor; sensitivity; AI policy; initial permission gate.	Court name/type; session_type; date; presiding officer; prosecutor; sensitivity; AI processing allowed.	Create court_session; create audit event; route to permission gate; apply recording defaults disabled.
Court Sessions	Court Recording Permission Gate	Prosecutor, attorney	Permission status; basis; scope; sensitivity; AI processing allowed; warning acknowledgement; off-record rules.	Permission status; basis; recording scope; sensitivity; AI processing allowed; warning acknowledgement; pause mode.	Disable recording by default; require gate completion; audit start/stop/pause; enforce internal-session vs court-session basis.
Court Sessions	Court Session Detail	Prosecutor, attorney	Session metadata; permission state; notes; snippets; transcript status; exhibits introduced; outcomes; delay event link.	Court_session; notes; testimony_snippets; transcript segments; exhibit status; outcomes; delay_events.	Update session lifecycle; capture outcome; feed snippets into charge matrix and readiness engine.

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
Court Sessions	Courtroom Live Capture Mode (/live)	Prosecutor, authorised legal user	Left live notes/transcript; centre snippet builder; right prosecutor assist; bottom controls for snippet, exhibit, task, pause, end.	Live notes; transcript segments; witness_id; linked_charge_id; linked_evidence_id; suggestions; pause/off-record events.	Create timestamped notes/snippets; compare live testimony with matter data; suggest follow-ups; create tasks; audit every action.
Court Sessions	Live Notes / Transcript Panel	Prosecutor, court attorney	Timestamped note editor; transcript feed placeholder; low-confidence markers; correction tools; source timestamps.	Court notes; transcript_segments; timestamps; confidence; correction history; review status.	Generate/correct transcript segments; mark unofficial; create audit trail for corrections and approvals.
Court Sessions	Snippet Builder	Prosecutor, attorney	Snippet type selector; witness/charge/evidence links; summary; transcript excerpt; prosecutor note; review status.	Testimony_snippets; snippet_type; witness_id; charge_id; evidence_id; excerpt; confidence; review_status.	Create identity/timeline/location/intent/possession /contradiction snippets; feed proof matrix; require review.
Court Sessions	Prosecutor Assist Panel	Prosecutor only	Contradictions; missing elements; fair follow-up suggestions; confidence; sources; accept/dismiss actions.	Live_prosecutor_suggestions; source references; confidence; missing info; suggested next action; review status.	Compare live testimony to prior data; suggest clarification questions; create defence version entries; never make guilt/lying claims.
Court Sessions	Pause / Off-Record Controls	Prosecutor, authorised legal user	Pause button; off-record marker; excluded segment reason; resume; status indicator.	Recording state; pause events; excluded sections; user; timestamp; reason; session status.	Pause capture; mark excluded segments; prevent AI use of off-record sections; log start/pause/resume/stop.
Court Sessions	Court Session Review (/review)	Prosecutor, attorney	Session timeline; snippets; transcript; suggested tasks; exhibit links; defence versions; approval queue.	Court session; snippets; transcript segments; suggestions; tasks; evidence links; defence versions.	Review/approve/reject snippets; generate post-court actions; update readiness and delay attribution.
Court Sessions	Transcript Segment Review	Prosecutor, paralegal	Segment list; confidence; edit/correct; source timestamp; approve/reject; export restrictions.	Transcript_segments; segment text; confidence; corrections; review status; timestamp; user actions.	Flag low-confidence segments; require review before source use; log corrections; prevent official-record claims.
Court Sessions	Testimony Snippet Review	Prosecutor, evidence analyst	Snippet queue; source excerpt; linked data; approval buttons; task creation; proof-matrix push.	Testimony_snippets; sources; linked charge/witness/evidence; review status; prosecutor notes.	Approve snippets; link to proof elements; create follow-up tasks; preserve draft/reviewed/approved/rejected states.
Readiness Engine	Prosecution Readiness Dashboard (/criminal/readiness)	Lead prosecutor, practice manager	Matter-level score; charge score; witness readiness; evidence readiness; procedural readiness; risk closure; thresholds.	Prosecution_readiness_scores; charge_readiness_scores; court_day_readiness_checks; risks; tasks.	Calculate transparent score; classify trial-ready/mostly ready/not ready/high risk; generate remediation plan.
Readiness Engine	Witness Readiness Detail	Witness coordinator, prosecutor	Per-witness readiness; availability; statement quality; consistency; safety; court performance risk.	Witness profile; statement status; consistency flags; attendance; safety; prep status; risk score.	Update witness readiness score; escalate high-risk categories; create prep, attendance or safety tasks.
Readiness Engine	Evidence Readiness Detail	Evidence analyst, prosecutor	Exhibit completeness; chain status; hash status; admissibility risk; linked charge coverage.	Evidence items; chain records; digital hashes; exhibit status; admissibility risks; charge links.	Flag chain/admissibility gaps; update evidence readiness score; create remediation tasks.
Readiness Engine	Court-Date Readiness Checks	Prosecutor, paralegal	Next date checklist; witnesses; exhibits; logistics; disclosure/procedural steps; open risks; sign-off.	Court_day_readiness_checks; appearance; tasks; witnesses; exhibits; logistics; procedural items.	Generate court-date checklist; block green status when critical gaps remain; send reminders and escalations.

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
Readiness Engine	Risk Remediation Plan	Lead prosecutor, practice manager	Material gaps; owners; due dates; required fixes; readiness impact; review status.	High-risk contradictions; missing evidence; intimidation alerts; media risks; tasks; owner assignments.	Auto-create remediation plan below readiness threshold; assign owners; track closure before court date.
Defence and Risk	Defence Version Tracker (/defence-versions)	Prosecutor, investigator	Defence version entries; issue type; factual claim; source/date raised; rebuttal evidence; task status.	Defence_versions; alibi/mistaken identity/accident/consent/procedural attacks; linked evidence; tasks.	Create rebuttal tasks; compare with chronology; prompt line-of-sight/search authority questions; update risk register.
Defence and Risk	Defence Issue Detail	Prosecutor, investigator	Issue profile; accused version; supporting documents/witnesses; prosecution response; evidence map.	Defence issue type; version; sources; linked evidence; witness statements; rebuttal task history.	Generate evidence response checklist; assign investigator; track closure; feed court-day brief.
Defence and Risk	Delay Attribution Log	Practice manager, prosecutor	Postponement reason; responsible party; impact; next action; owner; next date; reporting.	Delay_events; court session; reason; party; days added; impact; next action; status; owner.	Create delay events after postponement; track accountability; update readiness and practice dashboard.
Defence and Risk	Appeal / Review Risk Log	Lead prosecutor, attorney	Procedural issues; rulings; objections; record gaps; fairness concerns; mitigation tasks.	Appeal_review_risks; court rulings; objections; transcript snippets; procedural issues; mitigation actions.	Capture appeal/review risks from court sessions; assign mitigation; flag unresolved issues in readiness.
Defence and Risk	Media, Public Risk and Integrity Protocol	Partner, lead prosecutor	Media risk register; public lines; no-merits checklist; spokesperson field; political pressure notes.	Media_risk_events; spokesperson; approved public lines; leak incidents; access logs; risk committee notes.	Restrict commentary; approve public lines; review access logs after leak; maintain integrity decision trail.
Defence and Risk	Leak Incident Register and Access Review	Partner, compliance/admin	Leak report; affected matter; documents viewed; access logs; remediation actions; export audit.	Access logs; document views/downloads; restricted matter access; incident records; users; timestamps.	Detect unusual access; log incident; trigger access review; restrict matter; export audit evidence.
Communication and Safety	Victim / Complainant Communication Workspace	Prosecutor, authorised staff	Plain-language updates; court reminders; document requests; approval queue; trauma-aware templates; sent history.	Complainant contact; communication drafts; court dates; document requests; approval status; sent log.	Draft update for approval; send only after human approval; log communication; apply sensitivity and role controls.
Communication and Safety	Protection Escalation Workspace	Prosecutor, witness coordinator	Escalation route; responsible user; date escalated; status; outcome; restricted notes; audit trail.	Safety_escalations; witness; escalation owner; status; outcome; threat records; access controls.	Escalate witness safety concerns; notify responsible user; restrict records; track outcome and audit every change.
AI Governance	AI Output Review Centre	Prosecutor, attorney, admin	AI output queue; sources; confidence; missing info; suggested action; approve/reject/supersede controls.	AI_outputs; source set; confidence; missing information; review status; audit entry; model/action policy.	Require source-cited outputs; preserve draft/reviewed/approved/rejected states; log user decisions; prevent final unsupervised actions.
AI Governance	AI Policy and Source Control Settings	Firm owner, admin	Matter AI policy; excluded documents; transcription-only mode; AI disabled option; sensitivity levels.	AI policy; excluded document IDs; matter sensitivity; role permissions; processing basis; retention rules.	Apply matter-level AI controls; exclude privileged/sealed documents; log source set used in every AI action.
Security / Compliance	Restricted Matter and Sensitive Witness Access Screen	Admin, partner	Matter restriction settings; external counsel windows; sensitive witness mode; access approvals; permission audit.	Matter restrictions; roles; access windows; sensitive witness flags; external counsel permissions; audit logs.	Enforce server-side permission checks; log restricted access; expire external access; block direct URL access.
Security / Compliance	Audit Log Explorer	Admin, partner, compliance	Audit event filters; matter/user/date/category filters; export; evidence/transcript/AI critical event views.	Audit logs; event category; user; matter; timestamp; source set; before/after metadata.	Append-only audit history; export matter audit; detect failed access attempts and restricted-matter openings.
Security / Compliance	Recording and Transcript Retention	Admin, partner	Retention policy; download restrictions;	Recording records; transcript records;	Enforce retention; restrict downloads;

Module / Area	Screen / Route	Primary Users	Needed UI Elements	Core Data Needed	Workflows / Automations
	Settings		unofficial transcript labels; archival/deletion rules; POPIA purpose fields.	retention settings; processing purposes; access logs; archive status.	label unofficial transcripts; archive/delete only where lawful and audited.
Admin	User, Role and Permission Administration	Firm owner, admin	Users; roles; matter permissions; module access; external counsel invites; role templates.	Users; roles; permissions; firm_id; matter access; invitation status; access logs.	Provision role-specific dashboards; enforce least privilege; log role changes; revoke users and counsel access.

2. Workflow and Automation Catalogue

These automations should run across the screens above. Each one must respect tenant isolation, role permissions, human approval, source citation, and audit logging.

Workflow / Automation	Trigger	Automated System Action	Data Used / Created
Matter intake automation	New criminal matter created	Generate matter number; create default task set; apply sensitivity policy; create audit log.	Matter identity, firm_id, matter_id, owner, prosecution route, sensitivity.
Charge proof automation	Charge added or changed	Create charge elements; require proof mapping; mark unsupported elements red; create missing-proof tasks.	Criminal_charges, charge_elements, evidence links, witness links.
Court-date readiness automation	Court date approaching	Check witnesses, exhibits, logistics, procedural items and open risks; send internal reminders; escalate blockers.	Court_appearances, witnesses, evidence, tasks, readiness checks.
Witness risk scoring	Witness record, statement or safety status changes	Recalculate availability, statement quality, consistency, safety and court performance risk.	Witnesses, statements, risk assessments, prep logs, attendance.
Attendance confirmation	Witness unconfirmed before court date	Create reminder/escalation task; flag coordinator dashboard; update court-day brief.	Witness availability, subpoena status, service status, court date.
Safety escalation	Witness intimidation/threat marked	Restrict notes, create protection escalation, notify responsible user, log safety audit event.	Threat report, safety level, witness_id, escalation owner.
Evidence ID creation	Evidence item uploaded/created	Assign evidence ID, capture metadata, create hash for digital evidence, require source and chain fields.	Evidence_items, digital_evidence_hashes, storage metadata.
Chain gap detection	Evidence chain ledger missing required step	Flag gap, create authenticity task, update evidence readiness score.	Evidence_chain_events, custody steps, hash status.
Docket AI summary	Docket materials uploaded and AI allowed	Generate source-cited summary with facts, parties, witnesses, charges, gaps and next actions.	Documents, statements, reports, evidence list, AI policy.
Chronology extraction	Docket AI run or new source added	Extract timeline events and conflicts; cite sources; queue review.	Statements, reports, evidence dates, court events.
Missing evidence detection	Docket AI or proof matrix check runs	Identify missing reports, affidavits, videos, metadata or chain items; assign owner and due date.	Proof matrix, evidence map, court date, source gaps.
Contradiction radar	New witness statement or transcript snippet created	Compare against prior statements, docket facts and exhibits; create potential inconsistency suggestion.	Witness_statements, testimony_snippets, evidence, chronology.
Recording gate enforcement	User attempts live capture or recording	Block until permission status, basis, scope, warning acknowledgement and sensitivity are complete.	Court_session permission fields, user, timestamp.
Off-record protection	Pause/off-record mode activated	Exclude marked sections from AI processing; log pause/resume events; protect transcript segments.	Pause events, transcript segments, AI source policy.
Live testimony cross-reference	Live note/transcript/snippet created	Compare against matter data; suggest fair clarifications; create linked snippet/task as draft.	Transcript, witness, charge, evidence, prior statements.
Defence version capture	Defence puts new version or challenge	Create defence issue; map to chronology/evidence; assign	Defence_versions, chronology, evidence, investigator tasks.

Workflow / Automation	Trigger	Automated System Action	Data Used / Created
		rebuttal task.	
Delay attribution	Court postponement captured	Create delay event with reason, owner, responsible party, impact and next action.	Court_outcome, delay_events, next court date.
Readiness scoring	Matter data changes or readiness manually run	Calculate matter, charge, witness, evidence, procedural, court-date and risk closure scores.	Readiness tables, charge matrix, witness/evidence status, tasks, risks.
Risk remediation plan	Readiness score below threshold	Block ready status; create remediation actions; assign owners; show practice manager escalation.	Readiness score, risks, tasks, owners, due dates.
Court-day brief generation	Court appearance scheduled or updated	Generate appearance brief with witness list, exhibits, proof focus, defence issues, safety and logistics.	Court appearance, charges, witnesses, evidence, risks, tasks.
AI output governance	Any AI output generated	Attach sources, confidence, missing info, suggested next action, review status and audit entry.	AI_outputs, source set, prompt category, user, matter.
Restricted source enforcement	AI action requested	Exclude sealed, privileged, restricted or AI-disabled documents; log source set used.	AI policy, document metadata, matter sensitivity.
External counsel access expiry	External counsel invited or access window ends	Limit data shared, log views/downloads, revoke access automatically at expiry.	Permissions, access window, shared documents, access logs.
Leak/access review	Leak risk or restricted matter access review triggered	Compile access log; show viewed/downloaded records; create incident and remediation actions.	Access logs, document events, users, incident records.
Communication approval	Victim/complainant update drafted	Require human approval before sending; log draft, approval and sent status.	Communication drafts, complainant record, approval status, sent log.

3. Data Model Mapping by Screen Family

These entity groups should underpin the screen matrix. Every tenant-owned table should include firm_id, and every matter-owned table should include matter_id.

Entity Group	Likely Tables	Purpose in Screens
Criminal matter	criminal_cases, criminal_charges, charge_elements, charge_element_evidence_links	Case identity, docket/CAS, court, accused, complainant, charges, proof elements and linked support.
Parties	accused_persons, complainants, criminal_case_parties, investigators	Accused, complainants/victims, investigators, defence attorney if known, roles and relationships.
Witnesses	witnesses, witness_statements, witness_risk_assessments, witness_prep_logs	Witness profile, statements, availability, safety, preparation, contradictions and interpreter needs.
Evidence	evidence_items, evidence_chain_events, exhibit_status_history, digital_evidence_hashes	Exhibits, digital files, chain of custody, hashes, admissibility risk, linked charges and witnesses.
Court	court_sessions, court_appearances, court_outcomes, delay_events	Court dates, sessions, permission gate, outcomes, postponements and delay attribution.
Live capture	court_recordings, testimony_segments, testimony_snippets, live_prosecutor_suggestions	Permission-gated recordings, transcript segments, snippets, source timestamps and follow-up suggestions.
Readiness	prosecution_readiness_scores, charge_readiness_scores, court_day_readiness_checks	Matter, charge, witness, evidence, procedural, court-date and risk closure scoring.
Risk	defence_versions, media_risk_events, appeal_review_risks, safety_escalations	Defence issues, media risk, appeal/review risks, witness safety escalations and integrity trail.

4. Build Notes and Acceptance Gates

- Permission-gated recording is a blocking requirement: no recording or live capture should start until the Court Recording Permission Gate is complete.
- AI outputs must always include sources used, confidence level, missing information, suggested next action, human review status and audit entry.
- The system must not declare guilt, determine that a witness is lying, or send external communications without human approval.
- Every critical action should write an append-only audit event, especially evidence, transcript, recording, restricted access, AI and permission changes.
- The MVP should prioritise manual courtroom intelligence first, then docket AI, readiness scoring, audio/transcription and live prosecutor assist in later phases.
- Sensitive witness mode and restricted matter access must be visible in the UI and enforced server-side, not only hidden in the interface.

5. Source Used

Source document: Legal_Matters_Criminal_Prosecution_OS_Blueprint_v1_0.pdf. This extraction is based on the uploaded blueprint sections covering the Criminal Matter OS, Charge Element Proof Matrix, Witness Intelligence Hub, Evidence and Exhibit Ledger, Live Courtroom Capture and Testimony Intelligence, Docket Intelligence AI, Prosecution Readiness Engine, Court Preparation Workspace, Defence Version Tracker, AI Governance, Security, data model and route map.
