

LEGAL MATTERS

Platform Screens, Data, Elements, Workflows & Automations Inventory

This document converts the Legal Matters Product Blueprint v1.0 into a practical implementation inventory. It lists the platform screens/pages that should exist, the UI elements each screen needs, the core data entities required, and the workflows or automations each screen should support.

Source basis: Legal Matters Product Blueprint v1.0, dated 26 May 2026, prepared for Legal Matters product development.

Recommended MVP focus: firm setup, user/role management, client CRM, conflict check, matter list, matter overview, tasks, deadlines, document upload/classification, AI summary review, dashboard shell, billing basics, and audit logs.

#	Platform area	Screen / page	Needed UI elements	Core data needed	Workflows / automations
1	Auth	Login	Email/password, SSO option, forgot password, firm selector	users, firms, roles, permissions	Authenticate user, load firm context, enforce tenant access
2	Auth	Register firm	Firm name, practice type, address, contact details, plan selection	firms, users, roles, billing plan	Create tenant, create firm owner, assign default role
3	Auth	Invite user	Email invite, role selector, permission preview	users, roles, permissions, firms	Send invitation, create pending user, audit user invite
4	Auth	User profile	Name, email, role, notification settings, password/security	users, roles, notification preferences	Update profile, log security changes
5	Firm Admin	Firm settings	Firm details, practice areas, matter-number prefix, branding	firms, matter_types, workflow_templates	Save firm configuration, apply matter-numbering rules
6	Firm Admin	Branding & letterhead	Logo upload, colours, email tone, letterhead templates	firms, templates, document_templates	Apply branding to portal, letters, client updates
7	Firm Admin	User management	User list, roles, status, invite/remove buttons	users, roles, permissions, audit_logs	Add/remove users, role changes, access audit logging
8	Firm Admin	Role & permission matrix	Role table, permission toggles, matter access rules	roles, permissions, users, matters	Enforce RBAC, block unauthorised routes, audit changes
9	Firm Admin	AI policy settings	AI enabled/disabled, excluded document categories, approval rules	ai_policy, documents, roles, firms	Prevent AI from using restricted data, require approval for outputs
10	Firm Admin	Retention settings	Retention periods, archive rules, data export options	firms, matters, documents, retention_policies	Trigger archive reminders, retention confirmation during matter closure
11	Firm Admin	Template library	Matter templates, task templates, document templates, email templates	workflow_templates, workflow_steps, document_templates	Create reusable templates for practice-area workflows
12	Dashboard	Legal Command Centre	Today summary, risk cards, deadlines, messages, invoices, AI recommendations	matters, deadlines, tasks, documents, invoices, risk_alerts	Surface urgent work: deadlines, prescription risk, inactive matters, overdue invoices
13	Dashboard	Attorney dashboard	Today's deadlines, assigned tasks, high-risk matters, documents awaiting review, client updates due, AI actions	matter_tasks, matter_deadlines, matters, documents, ai_outputs	Prioritise assigned work, suggest next actions
14	Dashboard	Partner / firm owner dashboard	Firm revenue, matter risk, workload, pipeline, overdue invoices, profitability by matter type	matters, users, invoices, time_entries, payments	Monitor firm health, workload, risk and revenue
15	Dashboard	Practice manager dashboard	Overdue tasks, inactive matters, workflow bottlenecks, missing FICA/POPIA, document backlog	tasks, matters, workflow_steps, fica_records, popia_consent	Detect bottlenecks, trigger follow-ups, escalate inactivity
16	Dashboard	Accounts dashboard	Unbilled time, draft invoices, unpaid invoices, payments, expenses, trust/client funds flags	time_entries, expenses, invoices, payments, trust_transactions	Detect billing leakage, overdue invoices, payment gaps
17	Dashboard	Client portal dashboard	Matter status, next step, documents required, messages, invoices, secure upload, approvals	clients, client_messages, document_requests, invoices, matters	Client status visibility, upload reminders, approval requests
18	Client CRM	Lead pipeline	Kanban/list: enquiry, consultation booked, conflict check, onboarding, converted, declined, referred	clients, intake_forms, conflict_checks, matters	Move lead through stages, create client/matter after approval
19	Client CRM	Client list	Search, filters, client type, FICA/POPIA status, matter count	clients, client_contacts, fica_records, popia_consent	Quick lookup, status filtering
20	Client CRM	Create client	Individual/company toggle, identifiers, contact details, related parties	clients, client_contacts, related_parties	Create client, generate onboarding checklist
21	Client CRM	Client profile	Details, contacts, related parties, matters, documents, communication history	clients, client_contacts, matters, documents, client_messages	Central client record, link all matter activity
22	Client CRM	Client contacts & related parties	Add contact, role, relationship, opposing party marker	client_contacts, related_parties, conflict_checks	Feed conflict checks and matter-party mapping
23	Client CRM	Intake form	Practice-area intake questions, file upload, matter type selection	intake_forms, clients, matter_types, documents	Convert intake into client/matter, suggest workflow template
24	Client CRM	Conflict check	Search names, companies, related parties, previous matters, opposing parties	conflict_checks, clients, matters, related_parties	Run conflict match, require attorney approval before onboarding
25	Client CRM	POPIA consent	Consent status, processing purpose, privacy notice, access log	popia_consent, clients, audit_logs	Capture consent, log access, trigger missing consent alert
26	Client CRM	FICA / KYC checklist	ID docs, company docs, beneficial ownership, verification status	fica_records, clients, documents	Request documents, update verification status, flag incomplete onboarding
27	Client CRM	Engagement documents	Mandate, engagement letter, fee agreement, signed status	documents, clients, matters, document_versions	Track signed mandate/fee agreement before matter advances
28	Matter OS	Matter list	Search, filters, status, type, attorney, risk, readiness score	matters, clients, users, matter_types, matter_stages	Filter active, high-risk, inactive, overdue matters
29	Matter OS	Create matter wizard	Client, matter type, stage, responsible attorney, team, priority	matters, clients, users, matter_types, workflow_templates	Generate matter number, assign workflow, create starter tasks
30	Matter OS	Matter overview	Status, next step, risk, missing documents, deadlines, tasks, billing, AI actions	matters, tasks, deadlines, documents, invoices, ai_outputs	Matter-first command screen; recalculate readiness and risk
31	Matter OS	Matter details	Matter number, type, stage, status, attorney, team, priority, risk level	matters, matter_types, matter_stages, users	Update matter metadata, audit stage/status/risk changes
32	Matter OS	Matter timeline	Events, notes, documents, tasks, deadlines, messages, invoices, AI outputs	matter_events, matter_notes, documents, tasks, deadlines, invoices, ai_outputs	Append-only matter history, chronological audit trail
33	Matter OS	Matter notes	Add note, note category, private/public flag, linked task/deadline	matter_notes, users, matters	Log notes, optionally convert note into task/deadline
34	Matter OS	Matter team & access	Responsible attorney, team members, external counsel, access level	users, roles, permissions, matters	Restrict matter visibility, audit permission changes
35	Matter OS	Matter health panel	Readiness score, deadline risk, inactivity risk, missing docs, billing status, client update status	matter_readiness_checks, risk_alerts, deadlines, documents, invoices	Auto-calculate health, create alerts and suggested tasks
36	Matter OS	Close matter workflow	Final invoice status, archive status, outstanding tasks, closure communication, retention confirmation	matters, invoices, documents, tasks, retention_policies	Prevent closure until required checks pass

#	Platform area	Screen / page	Needed UI elements	Core data needed	Workflows / automations
37	Tasks	Task list	Task name, assignee, due date, priority, matter, status	matter_tasks, users, matters	Assign, update, complete, escalate overdue tasks
38	Tasks	Task detail	Description, checklist, comments, linked document/deadline	matter_tasks, documents, matter_notes	Create follow-ups, audit task updates
39	Deadlines	Deadline calendar	Calendar/list, court dates, filing deadlines, reminders	matter_deadlines, matters, users, notifications	Reminder schedule, missed deadline escalation
40	Deadlines	Create deadline	Deadline type, date, responsible user, reminder rules	matter_deadlines, users, matters	Create reminders, link to matter timeline
41	Deadlines	Deadline risk screen	Upcoming, overdue, critical, prescription risk	matter_deadlines, risk_alerts, matters	Escalate missed deadlines, suggest next action
42	Documents	Matter document hub	Folder tree, categories, upload button, document table	documents, document_versions, matters	Store matter-specific files by category
43	Documents	Upload & classify	Drag/drop upload, document type, confidentiality, related matter/deadline	documents, document_versions, matter_deadlines	Upload, classify, create metadata, start AI processing if allowed
44	Documents	Document viewer	Preview, metadata, AI summary, extraction, comments, version selector	documents, document_ai_summaries, document_versions	Review document, approve AI summary, log view/download
45	Documents	AI document extraction	Extract parties, dates, amounts, obligations, deadlines, missing information	documents, document_ai_summaries, ai_outputs	Upload-classify-extract-summarise workflow
46	Documents	Version history	Draft/signed versions, changed by, timestamp, status	document_versions, users, audit_logs	Track draft/signed version changes
47	Documents	Bundle builder	Select documents, order, index, readiness checklist, export	documents, workflow_steps, matter_readiness_checks	Generate court/counsel/client bundle index
48	Documents	Confidential documents	Confidentiality flags, restricted access, AI exclusion toggle	documents, permissions, ai_policy	Block unauthorised access and AI processing
49	Workflow Engine	Workflow template list	Litigation, debt collection, labour, conveyancing, estates, RAF, family, commercial	workflow_templates, matter_types	Select, clone, edit workflow packs
50	Workflow Engine	Workflow template editor	Stages, required fields, required documents, tasks, readiness checks, AI templates	workflow_templates, workflow_steps, matter_readiness_checks	Configure practice-area workflows
51	Workflow Engine	Matter stage board	Current stage, required tasks/docs, readiness score, next stage button	matters, workflow_steps, tasks, documents	Prevent stage movement if readiness rules fail
52	Workflow Engine	Readiness engine screen	Score, missing requirements, blockers, suggested fixes	matter_readiness_checks, documents, tasks, matters	Recalculate readiness by matter type/stage
53	Workflow Engine	Litigation workflow	Intake/conflict, pleadings, discovery, pre-trial, trial prep	matters, documents, tasks, deadlines, counsel briefs	Generate litigation checklist, bundle readiness, counsel brief
54	Workflow Engine	Debt collection workflow	Intake, demand, summons, judgment/enforcement, collections monitoring	matters, invoices/amounts, documents, payment arrangements	Demand-letter workflow, payment follow-ups, promise-to-pay reminders
55	Workflow Engine	Labour workflow	Intake, CCMA readiness, evidence bundle, arbitration prep, outcome	matters, deadlines, documents, witnesses	CCMA deadline prompts, evidence bundle checklist
56	Workflow Engine	Conveyancing workflow	Instruction, onboarding, clearances, lodgement readiness, registration/closure	matters, fica_records, documents, clearances	FICA onboarding, lodgement readiness checklist
57	Workflow Engine	Estates workflow	Intake, executor appointment, administration, L&D account, distribution/closure	matters, documents, assets, liabilities	Master Office step tracking, distribution checklist
58	Workflow Engine	RAF / personal injury workflow	Accident intake, evidence, chronology, quantum, litigation/settlement	matters, medical_records, documents, offers	Chronology generation, quantum document checklist
59	Workflow Engine	Family law workflow	Divorce, maintenance, parenting plans, financial disclosure, settlement docs	matters, documents, tasks, deadlines	Financial disclosure reminders, settlement pack generation
60	Workflow Engine	Commercial workflow	Contract review, resolutions, transaction checklist, obligation tracker	matters, documents, obligations, tasks	Obligation extraction, contract review checklist
61	AI	AI action panel	Contextual buttons: summarise matter, draft update, create chronology, check readiness	ai_outputs, matters, documents, tasks	Trigger matter-specific AI actions
62	AI	Matter Intelligence	Matter brief, facts, risks, next steps, missing information	matters, documents, notes, deadlines, tasks, ai_outputs	Generate matter summary with sources and confidence
63	AI	Document Intelligence	Summary, parties, dates, amounts, obligations, deadlines	documents, document_ai_summaries, ai_outputs	Extract structured data from documents
64	AI	Deadline Intelligence	Suggested deadlines, reminder schedule, missed deadline warnings	deadlines, matter_types, workflow_steps	Suggest deadlines from matter/document context
65	AI	Risk Radar	Prescription risk, inactive matter, missing mandate, missing FICA/POPIA	risk_alerts, matters, documents, consents, deadlines	Auto-create alerts and suggested tasks
66	AI	Drafting Assistant	Letter drafts, checklists, client updates, summaries	ai_outputs, templates, matters, documents	Draft with human approval required
67	AI	Client Communication AI	Plain-language client update, tone/language selector, approval state	client_messages, ai_outputs, matters	Draft update, require review, then send/save
68	AI	Billing Assistant	Suggested time entry, billing narrative, activity-without-time warnings	time_entries, matter_events, documents, messages	Detect missed billable activity
69	AI	Counsel Brief AI	Facts, issues, chronology, documents, questions for counsel	matters, documents, notes, ai_outputs	Generate counsel brief package
70	AI	AI output review	Generated content, sources used, confidence, missing info, suggested next action, approval status	ai_outputs, ai_audit_logs, documents, users	Review/edit/approve/reject/save/send
71	AI	AI audit log	Prompt category, source set, output type, user action, approval status	ai_audit_logs, ai_outputs, users, matters	Log every AI action and user decision
72	Compliance	Compliance hub	POPIA, FICA, LPC/trust readiness, confidentiality, AI governance, auditability cards	popia_consent, fica_records, trust_transactions, audit_logs	Compliance status summary and exceptions
73	Compliance	POPIA management	Consent records, privacy notice templates, purpose fields, retention settings, data access logs	popia_consent, clients, audit_logs, retention_policies	Missing consent alerts, retention reminders
74	Compliance	FICA management	KYC checklist, document requests, beneficial ownership, verification status	fica_records, documents, clients	Request missing documents, verify onboarding status
75	Compliance	LPC / trust readiness	Matter accounting separation, trust/client funds flags, approval logs, audit export	trust_transactions, invoices, payments, audit_logs	Flag trust/client funds, export records for accountants/auditors
76	Compliance	PAIA request management	Information requests, deadlines, firm policy documents, response status	paia_requests, documents, deadlines	Track PAIA responses and deadlines
77	Compliance	Confidentiality controls	Matter restrictions, document flags, AI exclusion rules, access logs	permissions, documents, audit_logs, ai_policy	Restrict viewing/downloading/AI processing
78	Compliance	Audit log dashboard	Filter by matter, user, event type, date; export	audit_logs, matter_events, users	Export audit trail; review critical events
79	Billing	Time capture	Matter, user, activity type, billable/non-billable, rate, narrative, invoice status	time_entries, users, matters, invoices	Create time entries; suggest narratives from activity
80	Billing	Expense capture	Expense type, amount, date, receipt upload, matter link	expenses, documents, matters	Add disbursements to matter/invoice
81	Billing	Draft invoices	Invoice builder, time/expense selector, client details, tax, preview	invoices, time_entries, expenses, clients	Generate draft invoice from time/expenses
82	Billing	Invoice list	Draft, issued, paid, overdue, write-off filters	invoices, payments, clients, matters	Track invoice status and overdue payments
83	Billing	Payment capture	Invoice, payment amount, date, method, reference	payments, invoices	Mark invoice paid/part-paid, update dashboard
84	Billing	Overdue invoices	Ageing, client, matter, responsible attorney, reminder action	invoices, clients, notifications	Trigger payment reminder workflow
85	Billing	Write-off approval	Write-off amount, reason, approver, approval status	invoices, audit_logs, users	Require approval and audit write-off
86	Billing	Billing leakage	Activity without time, document work without time, messages without time	matter_events, documents, client_messages, time_entries	Detect unbilled work and suggest time entries

#	Platform area	Screen / page	Needed UI elements	Core data needed	Workflows / automations
87	Client Portal	Portal login	Secure login, magic link/OTP, matter selector	client_portal_users, clients, matters	Authenticate client, restrict to own matters
88	Client Portal	Matter status	Matter stage, next step, attorney update, simple timeline	matters, matter_stages, client_messages	Show plain-language status updates
89	Client Portal	Document requests	Required documents, upload button, status, due date	document_requests, documents, clients	Request missing docs, remind client, notify firm on upload
90	Client Portal	Secure messages	Conversation thread, attachments, read receipts	client_messages, documents, users	Send/receive secure matter messages
91	Client Portal	Invoice view	Issued invoices, payment status, download invoice	invoices, payments, clients	Client invoice visibility and payment follow-up
92	Client Portal	Client approvals	Approve draft update, confirm information, sign-off tasks	approvals, client_messages, documents	Capture client approval or acknowledgement
93	External Counsel	Counsel access portal	Shared documents, brief, chronology, tasks, questions	external_counsel_access, documents, counsel_briefs, tasks	Share selected matter data only
94	External Counsel	Counsel brief viewer	Facts, issues, chronology, bundle index, documents	ai_outputs, documents, matters	Generate and share counsel brief package
95	Notifications	Notification centre	Alerts, reminders, mentions, overdue items, read/unread	notifications, users, matters	Central alert feed for deadlines, tasks, risk, billing
96	Notifications	Reminder rules	Deadline reminders, inactive matter thresholds, invoice reminders	notification_rules, deadlines, invoices, matters	Configure reminder schedules and escalation
97	Search	Global search	Search clients, matters, documents, notes, invoices, AI outputs	clients, matters, documents, notes, invoices, ai_outputs	Tenant-scoped search with permission filtering
98	Reports	Matter risk report	High-risk matters, prescription risk, inactive matters, missing documents	matters, risk_alerts, deadlines, documents	Generate risk reports for partners/practice managers
99	Reports	Billing report	Unbilled work, unpaid invoices, matter profitability, write-offs	time_entries, invoices, payments, expenses	Revenue visibility and leakage tracking
100	Reports	Compliance report	POPIA/FICA gaps, audit events, trust/client funds flags	popia_consent, fica_records, trust_transactions, audit_logs	Export compliance/audit-ready reports
101	Reports	Workload report	Tasks by user, overdue work, documents awaiting review	tasks, users, documents, matters	Show staff load and bottlenecks
102	Integrations	Email integration settings	Email sync, matter email capture, client message rules	integrations, client_messages, matter_events	Link emails/messages to matters
103	Integrations	Calendar integration settings	Court dates, consultation dates, filing deadlines	integrations, deadlines, calendars	Sync deadlines and reminders
104	Integrations	Accounting integration settings	Accounting provider, invoice sync, payment sync	integrations, invoices, payments, expenses	Future accounting sync
105	Integrations	Payment gateway settings	Payment methods, client invoice payment links	integrations, invoices, payments	Future online payment capture
106	System/Admin	Seed/demo data screen	Demo firm, users, clients, matters, tasks	firms, users, clients, matters, tasks	Load/reset demo data for testing
107	System/Admin	System audit / observability	Errors, logs, metrics, failed jobs	logs, audit_logs, jobs	Monitor AI/document/background jobs
108	System/Admin	Import/export	Client import, matter import, document export, audit export	clients, matters, documents, audit_logs	Migration support and audit exports

Implementation Notes

- Build the platform in phases: Foundation, Document Hub, AI Orchestration, Compliance Hub, Billing Basics, and Workflow Packs with the Readiness Engine.
- Keep every core record tenant-scoped with `firm_id` and every matter record matter-scoped with `matter_id` where applicable.
- Every critical action should create an audit event: matter changes, document actions, AI outputs, deadlines, billing actions, access changes, and client portal events.
- AI outputs should always include generated content, sources used, confidence, missing information, suggested next action, human approval status, and an audit entry.
- Client-facing communication and external messages should remain human-approved, not automatically sent by AI.
